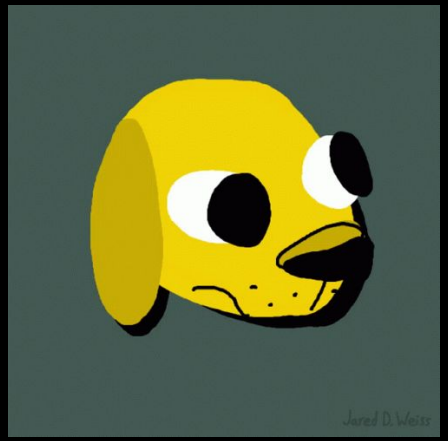
Dog Rates

Let’s see my project



WHAT IS THIS PROJECT?

This project is about

That there is a Twitter account named as “WeRateDogs“ that is about dogs rates and
My goal is to make insights about the data of this account

Tools I have used

1: Visual studio code

2: Python language

3: jupyter notebook

4: pandas library

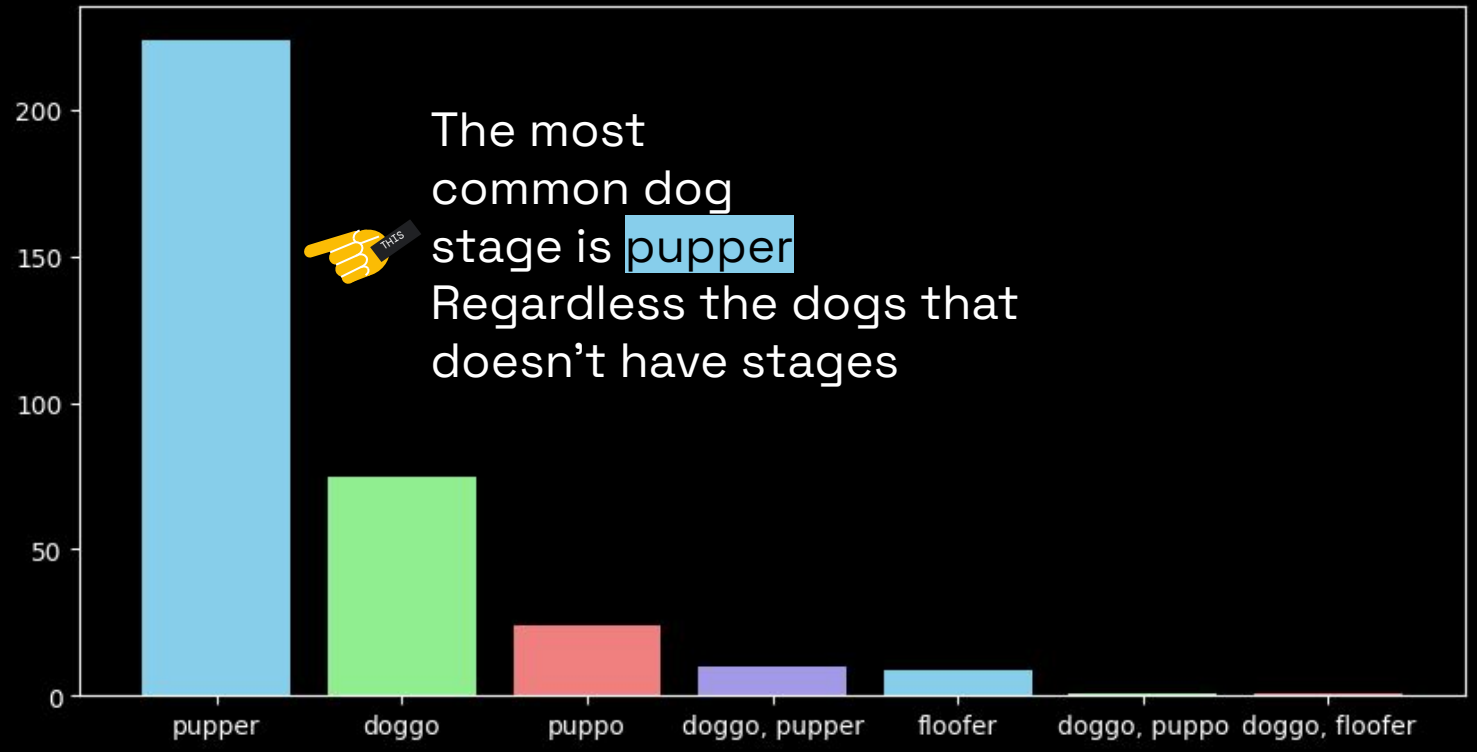
2: Numpy library

3: Matplotlib library

Analysis steps

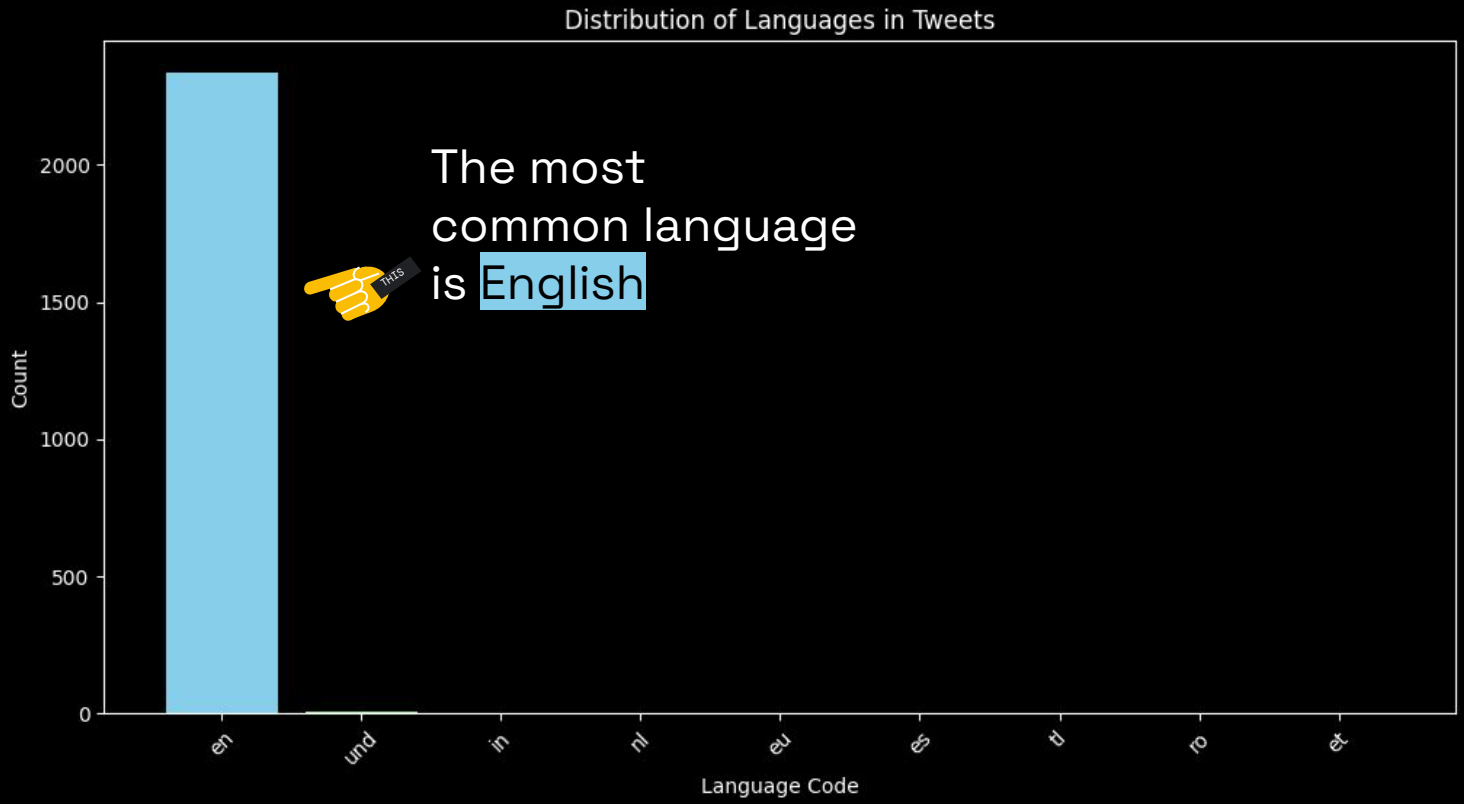
1. Gathering Data
2. Investigating Data
3. Cleaning Data
4. Investigating Data

First insight:



The most common dog stage is pupper
Regardless the dogs that doesn't have stages

Second insight:



The most common language is English

Thanks for your time
